

Train the Trainer MODULE

Date 6th – 8th February 2019

- 1 Point of departure**
- 2 Module schedule**
- 3 Location and costs**
- 4 Lecturers**
- 5 Certificate**
- 6 Registration Form**

1 Point of departure

The aviation market is continuously growing and develops dynamically. The constant changes are challenging the industry and training and management personnel in aviation companies. For this reason the regulator has implemented several rules concerning constant development and training of aviation staff. For example, it is by regulation expected that the operators carry out Crew Resources Management (CRM) or Team Resources Management (TRM) trainings to improve safety. Furthermore, it specifically mentions the benefits of regular continuation training for trainers.

This module aims at training the trainers, who train employees and post holders in aviation companies as external or internal trainers. Hence, all educators in aviation companies are welcome in our train-the-trainer module to learn more about new methodologies, procedures and lessons learned.

The module will be held during three consecutive days and address the following issues:

- Understand how we (human beings) learn
- Know-how to design courses effectively
- Learn how to instruct successfully
- Develop advanced presentation skills
- Know how to make good assessments and evaluate competences
- Understand CRM elements
- Refresh standard operating procedures
- Discuss lessons learnt from safety management
- Discuss leadership, communication and culture factors
- Learn about stress and workload management
- Learn about situation awareness and decision making
- Deepen knowledge on sleep, fatigue and vigilance
- Receive a personal assessment and make an assessment of the course instructors

2 Module schedule

Day 1: 6th February 2019

Time	Topic and content	Lecturer
From 9.00	Welcome Coffee	
09.30 – 10.00	Welcome and administration	Andreas Wittmer
10.00 – 10.30	How we learn Design a course Instructional technics	Andreas Wittmer Céline Mühlethaler
